AKHIL MUKESH

Bengaluru, Karnataka | +91 8618097296 | akhil1997mukesh@gmail.com | linkedin.com/in/akhil-mukesh-43376a126

PROFESSIONAL SUMMARY

Java Backend Developer with 6+ years of experience designing and delivering service-oriented, high-availability applications using Java, Spring Boot, Spring Security, and RESTful microservices in Agile/Scrum teams. Track record of improving application performance, reducing defect rates, and shipping data-driven reporting features across insurance and analytics domains. Skilled across the full SDLC — API design, unit testing (JUnit, Mockito), event-driven integration with Kafka/RabbitMQ, database optimization, and CI/CD — with hands-on exposure to Redis caching, Azure DevOps, and cloud data services. Currently expanding into agentic AI development with LangChain4j and Spring AI.

TECHNICAL SKILLS

Languages: Java, SQL, PL/SQL, Python, Scala, C, C++, JavaScript, HTML5, CSS
Java / Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, OAuth2, Hibernate, Microservices, REST APIs
Testing: JUnit, Mockito, SIT/UAT/DIT Test Case Design
Messaging & Integration: Apache Kafka, RabbitMQ
Databases: MySQL, Microsoft SQL Server, PostgreSQL, Redis
DevOps & Tools: Maven, Gradle, Jenkins, Docker, Azure DevOps, SonarLint, Git, Apache Tomcat
Cloud & Data: AWS (S3), Azure Data Analytics, Apache Spark, PySpark, Tableau
AI/ML: LangChain4j, Spring AI (in progress)
Methodology: Agile/Scrum, SDLC
Frontend: React.js

WORK EXPERIENCE

Developer — Tata Consultancy Services (TCS) **Jun 2022 – Present**
Project: If-Sampo | Java, Spring Boot, REST APIs, SonarLint, Azure DevOps, MySQL

- Develop and maintain web application features using Java/J2EE and Spring Boot, delivering new functionality for an enterprise insurance platform serving 5,000+ end users.
- Author SIT, UAT, and DIT (Development Independent Testing) test cases backed by JUnit and Mockito unit tests, maintaining 80% test coverage across release cycles.
- Play a key role building a new application on the Spring framework — including Spring Security — from the ground up, following Agile/Scrum practices across 3-week sprints.
- Enhance audit reporting and SQL-based data processing, improving database query performance by 20% and reducing average report generation time.
- Partner with cross-functional QA teams to triage and resolve testing issues, contributing to a 15% reduction in post-release bug fixes.

Associate Software Developer — UST Global **Jan 2021 – Jun 2022**
Project: Gigaton Analytics | Apache Spark, PySpark, PL/SQL, Tableau

- Designed and implemented complex database objects, including stored procedures and functions, using PL/SQL and SQL, streamlining data management workflows for 10+ downstream reports.
- Conducted Exploratory Data Analysis (EDA) and wrote advanced SQL queries to generate actionable insights, processing 100,000+ records/datasets per analysis cycle.
- Built dynamic Tableau dashboards for real-time product insights, adopted by 30+ stakeholders to support data-driven decision-making.
- Collaborated with cross-functional teams to identify, report, and validate defects, contributing to a 25% improvement in bug-fix turnaround time.

Internship Trainee — iPrimed Solutions **Aug 2018 – Oct 2018**
Project: Foodie | HTML5, CSS, JavaScript, Bootstrap, React.js, MySQL

- Built a category-based menu tab and a single-page checkout flow for an e-commerce web application.

- Created a responsive login form and reusable UI card components for the platform.

Internship Trainee — CDD Society **Mar 2018 – Jun 2018**

Project: CDD Society Website | HTML5, CSS, JavaScript, Bootstrap

- Developed a CMS-driven UI, including a responsive carousel/slideshow and cross-device layouts.
- Designed a contact form and integrated social sharing for Instagram, Facebook, Twitter, and YouTube.

PROJECTS

Agentic AI Exploration — Independent Project **2026**

LangChain4j, Spring AI, Java, Python

- Building foundational agentic AI components before adopting higher-level frameworks, as part of a structured self-directed upskilling roadmap.

Secret Image Processing — Independent Project **Jan 2019 – Jun 2019**

MATLAB, AWS S3, Java

- Built a system for securely sharing images by encrypting pixel data and distributing encrypted blocks across n participants via AWS S3, with client-side decryption.

Google Play Store Data Analysis — Mini Project

Python, Jupyter Notebook, Pandas, NumPy, Matplotlib

- Performed exploratory data analysis (EDA) on Google Play Store app data, applying Python/Pandas/NumPy/Matplotlib to surface trends in ratings, categories, and installs.

EDUCATION

Bachelor of Engineering in Information Science Engineering **2019**

East Point College of Engineering & Technology, VTU — Bengaluru, Karnataka

CERTIFICATIONS & ACHIEVEMENTS

- AWS Cloud Fundamentals — Udemy
- NPTEL Certification — Introduction to Machine Learning and Deep Learning (IMAD)
- Participant, GenAI Hackathon (TCS) and Capgemini Tech Challenge
- On-the-Spot Team Award for outstanding contribution (TCS)
- Runner-up, Account-Level Technical Quiz (TCS)
